:::Specializing in Secure Check Printing for Corporate Solutions:::

A NEW LOW COST-HIGH PERFORMANCE MODEL

Paper Size

6" X 9" 3up Checks or 6" X 12" 4up Checks.

Paper Type

Standard single check stock, or duplicate check stock with NCR.

Maximum Book Thickness

1/4" Maximum book thickness.

Minimum Book Thickness

Six pages with backer tag stock.

Stitcher Wire Size

Standard #25 round, optional #24 round, or 21X25 flat wire available.

Stitching Heads

Equipped with two Deluxe #26D head standard. ISP M2000, Deluxe G8, or Hohner 52/8 heads are optional equipment at additional charges. Tape Size Standard 23/32 X 600Yard rolls of tape. Grey or Black standard, other colors optional. BU 55" X 30" X 60" mounted on industrial grade casters for easy movement.

Machine Speed

8-12 completed check books a minute, or 480-720 books per hour. Higher production speeds available at an additional charge.

Power Required 220-240V AC Single Phase, 20 amp service required.

Additional Requirements

Dedicated internet connection for remotediagnosics, software updates, and usage counter access.

Features

Stitches cuts and tapes top bound check books in one operation. The operator simply inserts the pre printed checks into the loading station of the machine and presses the start button. The checks move through the machine automatically creating a top bound check book. The machine is equipped with jam detection as well as stitch detection to insure that the books are perfect every time.

Options

Production data acquisition, barcode tracking, high speed production model, 6" X 15" version, and stitcher head upgrades available at additional cost.

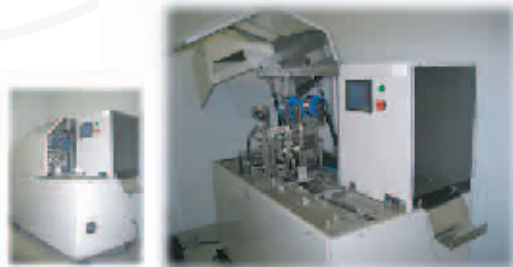

Warranty

Standard 1 year parts warranty from manufacturing defects. Consumable items are not covered under warranty.

PRINTER

Designed for the MICR 4300 and 9000, with 4 multiple input trays.

Here are some pictures of the first production model:

CheckRite 2004 MICR Check Printing

The fast approach to convert from Pre-printed checks to laser check printing

WINDOWS 98/ME/NT/2000/XP Version

Laser printing eliminates costly outside check form printing and allows the use of blank paper stock. Laser check printing means you will not have to contend with stocking large quantities of pre-printed checks which can become obsolete because of address changes, company name and changes in financial institutions.

- Other features:
- Checkbooks
 - Carbonless Copy
 - Deposit slips
 - Reorder Form
 - Multiple tray selection

1.) Backup and Restore of customer Account information with the Bank accounts. This new feature will give the customer the flexibility to save Account and Bank account information entered into the program. If the need arises to reload the program the new restore feature will restore all the account and bank account information the way it was before the program was removed or crashed.

2.) MICR only blank check printing. (bottom check). The MICR only feature will enhance the selection list for blank check printing of the program. It will allow the customer to print a "MICR only" format onto a pre printed check. If a customer has a program that prints a check without MICR code line, the program will print out the MICR line on the "Check on the Bottom" type check paper.
